**WHY?**

It's time to show who is the boss when it comes to command over the subject. The staple diet of all technical events is undoubtedly the presentation event, yet it has something in it which makes it exciting. If you have an idea which has been taking shelter in your mind that would change lifestyles visibly, make inroads into the development of geeky technology or even make some known technology effective and efficient then we offer you the stage to show who are the world and it is PRESENTARIO.
