RECTIFIER

CIRCUIT DEBUGGING

IdEEEas-2K21 **RECTIFIER**

" An intelligent person creates things using new resources, but a wise person uses existing things to create new ones"

Debugging gives us various opportunities to rectify the mistake done and sometimes to understand the circuit better. You develop intuition with a simulation. Analyzing electronic circuits and applying theoretical knowledge into a practical scenario is the main focus of this event.

IdEEEas-2K21 **RECTIFIER**

PRELIMINARY ROUND

- In the preliminary round, participants are given within a test that has to be solved in **30 minutes**.
- The questions comprise **Multiple choice questions (MCQs) and Reasoning**
- The top **five** teams will be allowed for finals.

IdEEEas-2K21 **RECTIFIER**

FINAL ROUND

The final round involves debugging of the given circuit.

Simulators:

- **Tinkercad**
- **Ltspice**
- **NI simulator**

IdEEEas-2K21 RECTIFIER

Registration

- Entry fee: **₹50**
- **20% Discount** will be provided to **IEEE Membership holders.**
- All registered candidates will get the **confirmation mail.**
- Participants are requested to arrange a PC or Laptop.

IdEEEas-2K21 RECTIFIER

Code of conduct

- Abide by the **rules** made by the organiser.
- Malpractice is **not entertained**.

Decisions of the judges and coordinators are final.

Student Coordinators:

Manasa: 8073523435

Susheen: 7026708727
